www.continent8.com

Hit the ground running with New Jersey-licensed Continent 8 Technologies, the world's largest online gaming data center and global network solutions provider. With the opening of our data center in the Atlantic City Convention Center in June 2019, Continent 8 has increased capacity for gaming companies to take advantage of the incredible opportunities afforded by the legalization of sports betting.

Welcoming Sports Betting Operators

Gaming is poised to change dramatically through regulated sports betting. Continent 8 has supported online gaming vendors in New Jersey since 2014, and has expanded to Indiana, Iowa, Mississippi, Pennsylvania, and West Virginia, with upcoming locations in Colorado, Florida, Illinois, New Hampshire, Ohio, Oregon, and Tennessee.

The Only Licensed Independent IT Gaming Provider in Atlantic City

Continent 8 is the only independent IT provider licensed by New Jersey's Division of Gaming Enforcement to supply both data center and network services to online gaming licensees. With 20 years of gaming and multi-jurisdictional experience, we at Continent 8 are familiar with navigating challenging regulatory environments such as the changing laws affecting gaming operators following the repeal of PASPA.

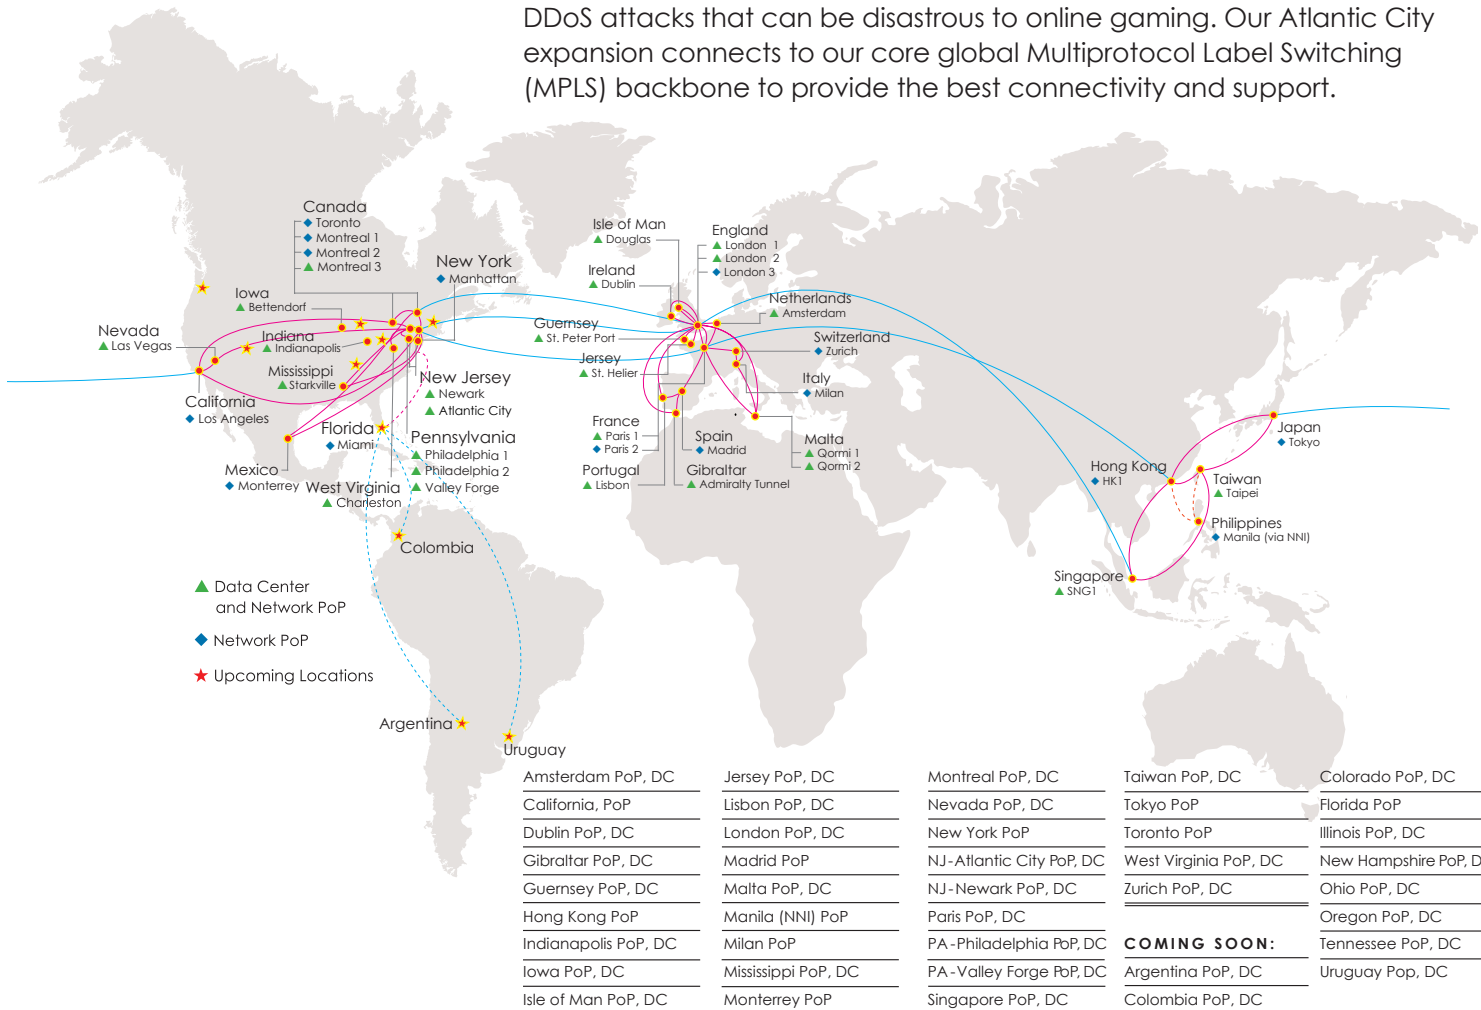

The Atlantic City location is connected to over 50 other Continent 8 locations, providing a worldwide network for gaming companies to expand globally with private connectivity to European and Asian operators, payment providers, software companies, and back-office systems. We have the capacity, experience, and breadth of solutions to help you start now in Atlantic City — and expand to other global locations and jurisdictions.

Expand your sports betting operations now. Take advantage of the incredible opportunities facing your company today.

A Global Network of Online Gaming Support

Continent 8 Technologies is an award-winning multi-jurisdictional global network solutions provider that connects, manages, and secures online gaming companies' most valuable information. Our advanced data centers and high-quality networks support critical online operations in both private and public-sector organizations in over 50 locations across Europe, Asia, and the Americas.

Continent 8 provides unparalleled protection against today's threats. Continent 8 Secure™ time-tested network service detects and mitigates DDoS attacks that can be disastrous to online gaming. Our Atlantic City expansion connects to our core global Multiprotocol Label Switching (MPLS) backbone to provide the best connectivity and support.
